

Kelly Aquino

Educational Experience:

I earned my Bachelor's Degree in Liberal Arts and Sciences with an emphasis in Mathematics at San Diego State University. I then went on to attend San Diego State University in order to gain my Multiple Subject teaching Credential with a Single Subject Authorization to teach in Mathematics classrooms from Kindergarten through ninth grade. During the credential program, I worked in the Cajon Valley School District, first in a second grade classroom, then in a fifth grade classroom. I began working here at Greater San Diego Academy in November of 2005 and enjoy my job very much. Currently, I am working on earning my Master's Degree in Kindergarten through Eighth Grade Mathematics Education.

Personal:

I grew up in Santa Maria, California and moved to San Diego in order to finish college. I really like the city and all of the unique things that it has to offer. I enjoy reading and relaxing on the beach. My hobbies include knitting and jogging. My family is huge and I try to spend as much time with them as possible.
