

Catalina Marine Science Camp

Description:

Enjoy a three day, two night Marine Biology Camp on the beautiful island of Catalina! It has some of the most preserved natural history in California. Secluded coves offer incredible visibility for snorkeling, and hiking trails often avail animals such as deer, buffalo and the island fox. MSA is located at Emerald Bay Cove which is known to be the most beautiful cove on the island and is one of the top 10 snorkeling spots in the world. Crystal clear water hosts vast amounts of sea life found nowhere else on the island. Each student will get a hands-on educational experience as they explore the renowned Pennington Marine Science Center. The Plankton Lab, fish aquariums, shark touch tanks, and invertebrate touch tanks are a few of the amenities that make this an unparalleled research and study center.

When: Monday, March 22 to Wednesday, March 24, 2010
